

How to Print a TREND Screen to File...

WARNING This procedure is for use with MISER 6.05 or 6.06 ONLY!
It may not work with any past or future versions of MISER other than those listed.

Listed below is a VMS command procedure to print the contents of a TREND window to a file in color postscript format.

```
$ ! Landscape mode color print to a file: Trend.PS in SYS$LOGIN
$ !
$ ! By M. J. Jerabek
$ ! 7-Nov-1998
$ !
$ xgrabsc := $mnet$exe:xgrabsc
$ xgrabsc -cps -compress -nolimit -l -page 8.5x11.0-0.0-1.0 -o sys$login:Trend.ps -id
                                                    "MISERtrend"
```

Running this command procedure will generate a TREND.PS file in the current login directory.

NOTE If more than one TREND window is currently open, only the first window found is output to file, after which the program exits.

To Output to a Printer

To generate a printed, hard copy output, enter the following command at the login directory prompt:

```
$ PRINT/QUE=$CPO TREND.PS
```
